

ZERO-CONTACT FREE STALL EQUIPMENT / INSTALLATION

We are offering a new type of installation to improve personnel safety:

SINGLE FILE FRONT EXIT FREE STALLS

This system, known as " ZERO CATTLE MAN / BOVINE CONTACT " prevents forced involuntary contact with the animals. Handling is more rational and faster, and the cattle are calmer than in traditional installations. Stress is reduced and high PH meat is less frequent.

90° STRAIGHT ZERO-CONTACT FREE STALLS

30° HERRINGBONE ZERO-CONTACT FREE STALLS
